# REPORT OF AUDITOR

Augusta, Maine, February 19, 1937.

To the Inhabitants of the Town of Winthrop, Maine:

This is to certify that we have examined the accounts of your Treasurer, Collector and Selectmen.

The attached reports of your Treasurer and Collector were carefully checked and the Comparative Balance Sheet was prepared by us from your Town Records.

We believe these reports to be correct.

Respectfully submitted,

STATE DEPARTMENT OF AUDIT,

By HAROLD E. CRAWFORD.

## REPORT OF THE LIBRARIAN

To the Trustees of the Charles M. Bailey Public Library:

I hereith submit my twentieth annual report as Librarian of the Charles M. Bailey Public Library for the year ending Feb. 6, 1937.

The falling off in receipts and circulation is due in part to the fact that our report is called for two weeks earlier than last year.

The circulation for this report is as follows: Fiction, 10,587; Juveniles, 713; Non-Fiction, 260; Total, 11,560.

During the year we have purchased 163 vols. of Fiction; 22 vols. Juveniles; 14 vols. Non-Fiction.

Friends of the Library have made some very generous donations of books since our last report.

From Mrs. Rose Parker, "Library of the World's best Literature", 30 vols.

From Rev. I. H. Lidstone, "Library of Oratory", 15 vols.; "History of Methodism", 6 vols.

From the Gilson Sister, Scott's "Waverly Novels", 25 vols.; Fiction, Poetry, Science, 54 vols.

Our tables are well supplied with the leading magazines of the day and are well patronized.

Respectfully submitted,

LULU A. CLIFFORD.

Librarian.

## ROAD COMMISSIONER'S REPORT

---

To the Citizens of Winthrop:

I herewith submit my sixth annual report as your Road Commissioner.

Due to the lack of snow and cold weather this winter, the roads should be in fairly good condition if we do not have a heavy rainfall as the one we had last spring.

The heavy rains of last spring made it necessary for a lot of early repairs, which left very little money for scraping and smoothing the dirt roads during the summer months, but in spite of this handicap, I think they were kept in fairly good condition.

The village streets that were tarred two years ago should be tarred again this year. To me this is one of the best improvements we have ever done to our village streets.

I wish to thank you for your cooperation and support in the past year and also to announce that I am a candidate for re-election.

Respectfully submitted,

PAUL AUDETTE,

Road Commissioner.

## REPORT OF CHIEF ENGINEER

---

I herewith submit my annual report of the Fire Department for the year ending February 10, 1937.

We have answered 64 calls: 44 chimney fires, 3 grass fires, 5 buildings, 2 brush fires, 1 auto, 3 factory, 1 in cook room at Community House, 1 assisting M. C. R. R. at time of washout on tracks, 4 false alarms.

The personnel of the department has been changed but little from last year, but we are continually changing the apparatus from year to year in order to keep it as near modern as we can afford.

I wish that everyone would cooperate with the Fire Department this coming year, and try to cut down the number of chimney fires. Every fall we have a clean-up week throughout the state, which is advertised in our daily papers. Please heed the suggestions, and see that your chimneys, smoke pipes, and rubbish corners are clean when our next winter approaches.

In relation to the false alarms, I wish to warn the public that the pulling in of a false alarm is a State Prison offense, and that we shall make every effort hereafter to locate the offender and see that he or she is brought to justice in accordance with the laws of our state.

We have kept within our appropriation again this year as usual, but did not get some material which we really need, and are hoping to be able to obtain it this year, and for that reason we are asking for a little more money.

For the financial statement of the department, please see the Selectmen's Report.

The Fire Department is subject to your inspection at any time and we are always very glad to have every citizen visit our home on Union Street.

Again I am proud to have the honor of serving you as Chief of the Fire Department, and thank you in behalf of Payson Tucker Hose Company for all favors, past, present, and future.

Respectfully submitted,

E. E. YORKE.

Chief Engineer.

## REPORT OF SUPERINTENDING SCHOOL COMMITTEE

---

To the Citizens of the Town of Winthrop:

The Superintending School Committee hereby submits the following report for the year ending March 1, 1937.

Our schools opened in September, 1936, with 534 pupils in the entire school system. There was no change in the teaching force of 17 except one. Mr. Howard Millett left us to accept a better position and his place was filled by Mrs. Ethel Whittier, a former teacher here.

For this coming school year we are offering, for your approval, a course in Home Economics in the High School.

This course will require, the first year, an added appropriation of \$1,250; the second year it will cost the town only \$1,000, and thereafter the sum of \$350 per year. This is possible because this course has both State and Federal aid. We believe this course would be a valuable addition to our school.

Without this addition, and to maintain our schools at their present status, the following sums are necessary:

Common Schools,	\$ 11,750 00
High School,	6,450 00
Text Books,	850 00
Repairs,	750 00
Supplies and Insurance,	1,700 00
Manual Training,	800 00
Superintendent of Schools,	700 00
School Physician,	150 00

Total,	\$ 23,150 00
With the addition of Home Economics,	1,250 00

Total,	\$ 24,400 00
--------	--------------

Respectfully submitted,

EDYTHE FRENCH,  
ARTHUR JONES,  
EUGENE E. YORK,

Superintending School Committee.

# REPORT OF THE SCHOOL PHYSICIAN

February, 1937

---

To the Superintending School Committee of the Town of Winthrop:

Examination of the school children for the year 1936-37 shows a level of general health that is not only satisfactory but is somewhat above that of the previous year. General nutrition is good with few exceptions. Defects of the teeth and throat are still the principal abnormalities. Enlarged tonsils and adenoids accompanied by carious teeth are found together in most of the affected individuals.

During the late fall and early winter whooping cough was responsible for many absences from school. This has now subsided. Skin diseases have been practically absent from the schools this year.

During 1936-37 an effort has been made to give the Winthrop school children protection against both small pox and diphtheria through the use of modern methods of active immunization. An attempt has also been made to locate those that have had contact with the tubercle bacillus at some time or other so that early advice and care in such cases might prevent the development of frank disease.

In March 1936, 286 children were vaccinated against small pox. At this time 230 were also given the Von Pirquet tuberculin test. Of those tested 13 gave positive reactions. 11 of the reactors were X-rayed at the Hebron State Sanatorium. In two of these cases it is believed that these procedures were instrumental in the prevention of serious illness. In January 1937, 214 children were immunized against diphtheria, a procedure that should give them a permanent protection against this disease. 22 children who had received treatment at other times were given the Schick test on this occasion to determine if they had developed a satisfactory degree of protection. Of this group only

two showed a susceptibility. They will be afforded another opportunity for immunization at a later date.

Injuries occurring on the school property have been rare during the past year. None of them have been serious.

The teachers are to be congratulated on the good care that they have given to their pupils.

Respectfully submitted,

G. H. LAMBERT, M.D.

# REPORT OF SUPERINTENDENT OF SCHOOLS

---

To the Superintending School Committee and the Citizens of  
the Town of Winthrop:

## GENERAL

The Schools of Winthrop are having one of the best years they have had since they have been under my observation. The classes at both the high and common schools are of a size that enables them to be handled very satisfactory. Although we are not able to indulge in any luxuries we are well supplied with the aids so necessary to produce the best results in the schools.

We have for some time discussed the advisability of introducing a course in home economics into the high school. Every citizen who follows present trends in the educational field realizes that our school system has been built around the book-bright pupil. This was a good plan when only those pupils attended school who were interested in books, and those who were not thus interested did not continue school. Today boys and girls who have not much interest in books, and who do not have the ability, or inclination, to learn from them, are flocking to our schools in increasing numbers. It becomes necessary for something to be done for this type of pupil, who if given a chance in school is likely to become in every way just as useful a citizen in the community as the child who readily grasps the contents of a book.

This need was recognized when manual training was introduced into the Winthrop schools several years ago. This course has induced several tuition pupils to remain with us, and has done much to encourage many boys who could not learn from books, but who were very handy with tools. They found that they could do some one thing better than others could and this knowledge gave them the feeling that while they might not be as bright in the classroom as some of their companions there was something that they could do well. This confidence prevented the development of an inferiority complex. In one case that I have in mind a boy became a fairly good student during the

latter part of his high school course, simply because he found he could really excel in some lines of work.

To balance the program it now seems proper to bring before the voters of the Town the question of establishing a home economics course for the girls at the high school. The cost for the first year will be \$1,250; for the second year \$1,000; and about \$350 a year from then on. The largest cost is to get the equipment installed and get started. After this is done the Federal and State governments bear two-thirds of the salary costs. Consequently, once this course is introduced, the cost to the Town is very small. While all the larger cities and towns have introduced home economics some time ago, a good many of the smaller towns are now taking advantage of introducing this low cost course for the girls. The results seem to be very satisfactory in every community where it has been tried.

We are not planning to make any high-pressured campaign to influence the voters on this matter. We shall try to place the facts before them in an intelligent manner and let the matter rest on the good judgment of the voters whether they wish to make the schools of Winthrop a little more modern in their appeal to all types of youth that enter the doors of the school for instruction. Discuss this matter among yourselves; look about you and see what other communities are trying to do, and decide after the first costs have been absorbed if the undertaking of \$350 a year is too much for the Town to invest in the girls attending high school. Personally, I believe it is a step in the right direction. We as school officials can only point the way and can go only as far as we have the support of the citizens of the community. With this in mind we wait your verdict on Town Meeting day.

### FINANCIAL

Due to the fact that the winter has been mild we have been able to save considerable on our fuel bill, and could close our books in the School Department without an overdraft.

Our tuition pupils number eighteen, four less than last year. This means that we face the loss of \$280 from tuition during the next school year. For these reasons we are asking for a slight increase in both the high and common school funds. You will note from the table on appropriations and attendance that even if home economics is included, we are running the larger school system on considerably less than in 1930. This is true even

after maintaining the new high school building which costs from three to four times as much to maintain as did the old high school.

I wish to thank all who have in any way contributed to the success of the Winthrop schools during this past year, especially I wish to call your attention to the Winthrop School Committee who have given so freely of their time and energy to make the school system one of which you could feel very proud to call "Our schools".

Respectfully submitted,

LEROY S. HUCKINS.

## REPORT OF HIGH SCHOOL PRINCIPAL

---

To Mr. Huckins, Superintendent of Schools:

I hereby submit my second report as Principal of Winthrop High School.

The fall term opened September 14, with an enrollment of 94 in the Junior High School and 159 in the Senior High School.

The attendance during the fall term was very satisfactory in both the Junior and Senior High school, but not quite so encouraging during the winter term due to an epidemic of severe colds.

Our daily program of seven, forty-five minute periods, which we adopted two years ago proved well suited to our needs, therefore, we accepted it again this year without any reservations.

A few minor changes will be noted in our course of study. Algebra is required of all Freshmen. We find that many of our students decide in their Junior and Senior years that they want to go to College, but they are unable to do so because they have not met the requirements in mathematics for any particular insti-

tution of higher learning. In order to prevent this handicap we have made algebra compulsory in all courses the Freshman year.

A class in Foods was sponsored by Miss Louise Hoke. This is a volunteer, no credit course, meeting once a week, open to Junior and Senior girls. This course deals in foods, as the name implies, and the science of culinary art. It is proving most practical and beneficial to the large number of girls enrolled.

Mr. Grant has completed his work in cataloguing and rearranging the school library. This was quite an undertaking, but I assure you it has been efficiently and carefully done. We are very proud of the completed project and we are most appreciative of the time and effort expended by Mr. Grant in bringing about such a remarkable transformation of a much neglected library.

Mr. Lapham and his crew of cabinet makers are making a new set of bookcases to take care of any new additions to our library family.

We wish to express our appreciation and thanks to Mrs. Lulu Clifford and Mrs. M. L. Stanley for their generous contributions to our library.

With the aid and whole-hearted support of the faculty and student body, by means of the Rambler, the monthly school paper, school plays, and other entertainment we have been able to diminish our old debt considerably. We have kept our running expenses within our means.

I wish, in closing, to express my sincere appreciation and thanks to all the parents and townspeople for their generous support and courtesy shown us at all times. I wish to thank the entire student body, and my honorable and most efficient associates, the teachers, the Superintendent and School Committee for their whole-hearted support and loyalty given us in all that we have undertaken to make this a successful year.

Respectfully submitted,

J. E. LAPLANTE.

## REPORT OF GRAMMAR SCHOOL PRINCIPAL

---

To Mr. Huckins, Superintendent of Schools:

I herewith submit my seventh consecutive annual report of Winthrop Grammar School.

There was a large entering class this year, but we had no difficulty in taking care of the children due to the fact that another room and teacher was added last year.

The attendance of pupils has been very irregular owing to the epidemics of whooping cough and colds. Much extra work will be required for pupils and teachers to bring the children's standing up to the requirements of each grade.

The aim of all education is the development of character. Character Education was emphasized at our State Convention this year.

The school and home must cooperate in this training. William Sadler, M.D. says—"The real purpose of education and mental discipline is not merely the acquirement of knowledge or the accumulation of facts but the development of character. The general tendency of the child's character is largely determined before it is four or five years of age. The foundation stones upon which a character is built are largely hewed out in the rough in the nursery several years before the child presents itself for admission to the public school. Responsibility is the watchword of the best thought in modern educational training. Training the pupil how gracefully and acceptably to bear responsibility is the chief factor in character development."

We try to develop a sense of personal reliability in regard to order, neatness, punctuality, kindness, courtesy, tolerance, gratitude, reverence, respectfulness, confidence, courage, perseverance, health, cleanliness, cheerfulness, honor, fair play, and patriotism.

A Socialized Temperance Curriculum has been prepared by a special committee and issued by the State Department of Education, called, "The Science of Living" which is proving helpful in teaching good citizenship.

"My Weekly Reader" the Junior Newspaper, has been used in our classes this year, as usual. This little paper provides

excellent reading material, and leads our pupils to the consciousness of a larger world. Children are much interested in their own newspaper.

The physical examinations have been given by Dr. Lambert. We are carrying on the Seven Point program as recommended by the State Department. We urge the parents to make corrections necessary for their children to be not only "Seven Point" children but healthy children.

Each year the teachers and pupils of the Grammar School appreciate more and more the work of the Charity Crusade, under the direction of Rev. J. R. McGowan, in providing hot food for the children who otherwise would have to eat cold lunches at noon.

We would also like to extend our thanks to the Charity Crusade and all others who have provided clothing for the needy.

During the year, monthly Teacher's Meetings have been held, in which problems and subjects of interest have been discussed. At one of these meetings the teachers enjoyed an illustrated talk by Miss Winnifred Dennison.

The teachers of our building have a 100% Red Cross membership; also a 100% membership in the National Educational Association for five consecutive years.

The past year has been very pleasant and we wish to thank the school officials, parents and friends for the splendid support they have given us in our work.

Respectfully submitted,

GRACE L. HOWARD,

Principal.

## REPORT OF MANUAL TRAINING

---

To Mr. Leroy S. Huckins, Superintendent of Schools:

I hereby submit my annual report of the work accomplished in Manual Training.

In June the annual exhibit was held in the high school, when the public had the opportunity to see and inspect the work that was actually done by the boys and girls for that year. The people who visited the exhibit gave their ideas about the projects which has helped us to do better work this year.

One hundred and three boys reported in September for regular instruction in Manual Training.

7th grade	25	9th grade	27
8th grade	30	10th grade	21
Total,		103	

Freshman and Sophomores have eighteen weeks of Mechanical Drawing, consisting of the following course:

1. Lettering.
2. Two view projection.
3. Three view projection.
4. Working drawing.
5. Threads.
6. Machine drawing.
7. Rotation of objects.
8. Intersection and development of sheet metal.

Because of the increased number of boys this year only ten girls could take the course. They are as follows;

Seniors,	6	Freshmen,	4
----------	---	-----------	---

More girls wish to take this course, but owing to the lack of room they could not. It is too bad that we could not have more room to accommodate both boys and girls who wish to take this course.

### APPRENTICES SCARCE

"One damage that will be done by the depression that may not be generally recognized is reduction of the skill of American

workers for which they have long been famous. For nearly ten years now work has been so slack there has been little chance for a beginner to learn a trade or business. When times are good there is always a demand for beginners because of the help they can give even in an unskilled way and thus increase the production of the skilled. There is an inclination to bother with them for the good that can be gotten out of them so the youngsters have a chance to learn and attain skill that will make them full-price workers. In dull times, however, skilled workers can take on extra work such as that done by beginners and their inclination is to do it all since there is little enough anyhow.

Already the lack of skilled young workers to replace the old is being felt as there has been time enough for many old workers to drop out with no trained youngsters to take their place. As soon as the demand is back to normal the lack of beginners will be more apparent. Youngsters will have to be trained where there is little time for such work and it will be some time before there will be enough of them to replace the normal decrease in the skilled and older workers. The flow of workers in industry, in other words has been so interrupted it will be years probably before it will be resumed in full force."

If the industries, the town, and the school could get together and work out a program where the youngster could get his training in school, there would not be a shortage of apprentices. This would take more money to do so, but would it not pay in the end?

In closing, I wish to thank the Superintendent, School Board, and parents for the cooperation they have given me in this year's work.

Respectfully submitted,

LESLIE LAPHAM.

## REFERENCES

Art. 21. Highways. We recommend the amount of \$3,500.00, \$500.00 to be used for tar treatment of the village streets and that a definite sum be allocated from this appropriation for the improvement of the Glenside Cemetery Road.

Art. 31. Perpetual care lots. We feel that the Town is not legally responsible in this matter and that this subject would better be discussed by the voters in town meeting.

Art. 40. Bowdoin Street Drain. Information seems to be lacking on what the cost of this drain would be and we feel that this should be attended to and possible cost incurred be paid from Town Charges.

Art. 49. Home Economics in Schools. The School Committee recommended this in their report but owing to unexpected necessary appropriations, we recommend that this be passed over this year.

Art. 51. Highland Ave. additional Street Lights. We recommend that this article be taken up out of order before article 39 with discussion from the floor.

Art. 57. Reimbursement for improvement of High School Grounds. For lack of information, we have no recommendation to make.

These recommendations come to a total of \$60,365.36 which is approximately \$1,725.36 in excess of the amount raised at the last annual town meeting and the Selectmen report to us that they do not anticipate any material change in the valuation for next year. This excess would mean a rise in the tax rate of about 1 mill.

Hon. H. E. Wadsworth, owing to the stress of business was unable to attend the meetings of this committee.

### PRESERVE THIS REPORT

A sufficient number of these reports have been printed to furnish every interested citizen with a copy. An effort has been made to get them into the hands of the voters in advance. It should be borne in mind that if copies are left at home there may not be sufficient number at the hall to go around on town meeting day. This year or any year it is desirable for you to have a copy of the annual report as soon as possible. It is also important for you to preserve it and bring it with you town meeting day.
